

Department: Shop	Reports To: Shop Manager
Location: Lakeland	Revised: January 2023

JOB SUMMARY:

This position performs the machining requirements of our shop as well as having both assembly/disassembly responsibility on larger repairs and projects. This position also includes willingly supporting other employees in areas such as fabrication, welding, repair, and field service.

ESSENTIAL FUNCTIONS:

- Be able to comprehend shop drawings, blueprints, schematics, and manuals, for assembly of equipment
- Plan the sequence of necessary actions for the completion of a job
- Select appropriate machines (lathe, mill, etc.) and position or load material for a job
- Monitor machine while working to adjust the feed, maintain temperature and identify issues
- Check output to ensure consistency with specifications and discard defects
- Perform routine machine maintenance and repair minor damages
- Operating saws, grinders, and power tools
- Mechanical skills and troubleshooting abilities are necessary
- Actively participate in our Core Values: Team Play, Achievement, and Better Every Day

EDUCATION:

- High School Graduate or G.E.D
- Completion of vocational training or an apprenticeship preferable

WORK EXPERIENCE:

- 3 years of experience minimum

LICENSES AND CERTIFICATIONS:

- Must be able to attain our BPI Forklift Certificate

SKILLS AND ABILITIES:

- Ability to communicate both in writing and verbally.
- Able to carry out a series of work instructions without constant supervision
- Proven experience as machinist
- Ability to use precision tools (calipers, micrometers, etc.) to take accurate measurements
- Knowledge of the properties of metal and other material
- Able to perform basic math with analytical abilities
- Perform physical activity that includes heavy lifting
- Industrial pump repair experience will be an asset
